

Two Design comparison

User request : I need to double check the final design with original. I need to know the density change is as we think.

Compare mode.

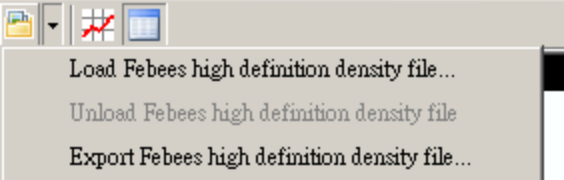

Design mode.

1 Open your design which you want to compare as background.

2  Press DF button.

3  Select Export and save.

4 Press design view  . Start design or open new version design.

5  Press DF button and load “Febees HD density file “

6 You can switch Compare and design mode now

1st Design

2nd Design

Subtracting Mode

Blue: decrease
Yellow: increase

Dividing Mode

Blue: decrease
Yellow: increase

View Density data in Preview and background Mode

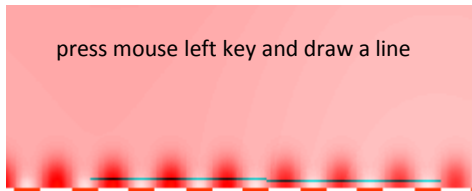

- On/Off design change with background
- Preview (same as output) CCD mode
- Preview (same as output) B&W

- Chart mode
- Table mode

Chart and table icon are functional in preview and background mode

Chart mode

Show density chart

Auto scale

| X | Y | Density |
